

📍 INGOLSTADT

Project Manager

At Pixida we are passionate technology consultants and developers for digitalization and mobility solutions.

As we continue to grow, we are looking for Project Manager to own, develop and implement innovative products and improve knowledge bases.

Your Responsibilities

- › You manage and control a project team and collaborate with multiple stakeholders in an agile working environment
- › You are part of the entire lifecycle of the project: planning, implementation and conclusion of the project
- › You coordinate and present the final project results
- › You manage the independent order processing
- › Responsibility for new and existing documentation updates to optimize and improve processes

Our Requirements

- › You possess a successful completed degree in Engineering or any similar field or education in automotive
- › You already gain experience in managing topics of the automotive industry
- › You know yourself around different tools (MS Office, Jira, Confluence) and have agile working skills
- › You are a well organized person with a structured way of working with the sense for details
- › You speak German and English on a business level

Seeking a dynamic challenge? Let's team up!

Hinteregger, Fernanda
